## **JUNIPER NETWORKS J-PARTNER PROGRAM FOR CONSULTANTS**

Juniper Networks has launched a [J-Partner Program for Consultants](#). This program provides industry consultants with access to important information and training on Juniper's products and solutions - highlighting best-practices for planning, designing, and implementing world-class products, services, and solutions for high-performance networks.

Benefits of joining the J-Partner Program for Consultants include access to:

- Key data on Juniper's Enterprise, Government and Service Provider solutions
- Technical support and expertise to assist in solution evaluations and understanding
- Design and configuration tools and training
- Consultant newsletter providing up-to-the-minute Juniper product and solution news, case studies and event details
- Juniper Consultant Events

Juniper remains uniquely positioned to maintain industry leadership based on our core competencies in architecture, silicon design, and the industry's only carrier-class, purpose-built "pure IP" modular network operating system - JUNOS®.

Juniper offers a broad product portfolio, including routing, switching, security, application acceleration, identity policy and control, and management designed to give customers unmatched performance, greater choice and flexibility while reducing overall total cost of ownership.

Our customers include the top 100 global service providers, 30,000 enterprises, including all of the Global Fortune 100, as well as hundreds of federal, state and local government agencies and higher education organizations.

Juniper is excited to offer this new program enabling consultants to recommend our best-in-class networking and security solutions to your clients.
